## P2 Program

United Refrigeration of Canada Ltd (URC) is committed to preventing or reducing adverse environmental impacts of its operations.

As an importer of halocarbon refrigerants URC is required to be a part of a P2 program. A P2 program requires that refrigerant importers offers a stewardship program that properly manages refrigerants to end of life.

URC has operated a very successful refrigerant management plan (RMP) for many years. This successful program has become an integral part of URC's overall stewardship and P2 program.

Through our 14 locations, URC accepts halocarbon refrigerants from stationary refrigeration and air conditioning contractors. By accepting refrigerants from HVAC/R contractors URC is helping to prevent the potential release of refrigerants into the environment.

Thank you
